

Building a relationship with God

"The Scripture cannot be broken" John 10:35

PART 2: THE PERFECT GUIDE WITHOUT ERROR!

Fast Facts: A brief overview of some of the proof.

The 66 books of the Bible were written:

1. On three continents.
2. In three languages.
3. By about 40 different people including (kings, shepherds, scientists, attorneys, an army general, fishermen, priest, and a physician.)
4. Over a period of about 1,500 years.
5. By people who, in most cases, had never met.
6. By authors whose education and background varied greatly.

Scientific Facts

Among other facts presented in the Bible, it also contains a treasure chest of scientific facts. The Bible said it was so, before scientists ever new, such as the following examples: In **Job 26:7**, the Bible tells us that God hangs the stars. In **Isaiah 40:22**, the Bible tells us that the earth is round. In **Job 28:25**, the Bible tells us that air has weight, which science now calls "barometric pressure". In **Proverbs 17:22**, the Bible tells us that emotional trouble causes the bones to be weak. In **Colossians 1:17**, the Bible tells us that God holds all things together, scientists still don't know how the atom is held together. Maybe they should read their Bibles.

Historical Facts

1. **For years skeptics said the Bible was unreliable because it mentions the Hittite nation.** (Deuteronomy 7:1) and cities like Ninevah (Jonah 1:1-2) and Sodom (Genesis 19:1), which they denied ever existed. But now modern archaeology has confirmed that all three did, indeed exist.
2. **Critics also said that Bible-mentioned kings Belshazzar.** (Daniel 5:1) and Sargon (Isaiah 20:1) never existed. Once again, it has now been confirmed they did exist.
3. **Skeptics also said the Bible record of Moses was not reliable because it mentions writings.** (Exodus 24:4) and wheeled vehicles (Exodus 14:25), neither of which they said existed at the time. They of course, know better today.
4. **At one time the 39 kings of ancient Israel and Judah who reigned during the divided kingdom were authenticated only from the Bible record, so critics charged fabrication.**

But then archaeologists found cuneiform records that mentioned many of these kings and, once again, the Bible record was proved accurate. Critics have repeatedly been proved wrong as new discoveries confirm biblical people, places, and events.
